STRIKES THE RICHEST OIL POOL OF THE OSAGES

independent enterprise from the start, Uncle Sam drillers have completed two more mammoth fortune makers during the past week. No. 13 was finished last Tuesday, and the first day's flow is estimated between 400 to 700 barrels, while undoubtedly No. 14, which the drillers are now working hard to got under control, is one of the very largest producers yet discovered in Indian Territory off fields, and is estimated by conservative oil men as better than 2,000 barrels the rst day. As the Uncle Sam drills move westward larger oil whils are being cured, and drillers from oilers Nos. 13 and 14 will soon move to locations Nos. 15 and 16, and continue further rapid development, and may soon secure the main

Furnace fires will be lighted under the great river refinery July 4th. Thousands of tincle Sam stockholders and their friends will be in Atchison on that day. 380-ton, three-decked Mississippi river steamer will make half-hour trips from Atchison city proper to Uncle Sam refinery grounds. If you don't think that Uncle Sam with the main trunk river pipe line and barges will be able to block the railroad oil frust criminal relate deals, come to Atchison on July 4th and you will see a practical illustration of what can be done. Uncle Sam is doing things, will make good every promise, and the stock offered herein to you at the old price of 20 cents per share is just as sure to increase in solid value to \$1.00 per share as you are a foot high. When completed this company can save over 75 cents per barrel over the pipe line and barge system, which alone would pay nearly 10 cents per share on the very stock you can now purchase at 20 cents per share.

Uncle Sam stockholders are doubling and trebling their investments. Over onequarter million dollars has been subscribed for 20-cent refinery stock, and with all the additional development the stock is being rapidly sold. The facts are that stock in The Uncte Sam Oil Company of Kansas is the greatest investment offered the American public. Earning capacity of refineries will be increased nearly tended on an average for the next six months, and will be continually increased until it is up to eighteen thousand barrels daily. If a safe investment and dividend is what you want, better join our band, now over eight thousand strong, and help to grander success the only formidable foe to oil trust oppression west

DIVIDENDS COMMENCE THIS MONTH

River Refinery Starts July 4.

On the 4th day of next month the largest independent refinery ever built in the West will commence turning out refined oil. This plant has been built so that it can easily be enlarged to 10,000 barrels her day. Situated on the banks of navigation it will be forever free and independent of the brigand of cutthroats who manipulate the oil trust and the railroads, and generally strangle the inland refinery. However, the Uncle Sam company has gone in to win and win they will, for with the main trunk pipe line now building and barges on the Missouri we can deliver Uncles Sam oil from Kansas-Ferritory oil fields to Omaha, Council Blurs and Sloux City at a saving of over 75 cents per barrel, which alone will pay handsome dividends on Uncle Sam stock. Figure for yourself what the saving will be on even 4,000 barrels per day at 75 cents each, and it will convince you what a fortune making stock you are offered herein.

Big Steamer Will Navigate the Missouri

Big Steamer Will Navigate the Missouri at Atchison July 4.

For years the railroads and the oil trust working together, have tried to discourage and keil all water transportation, but the business men of the Missouri valley are waking up and it will be just a question of time until the great Uncle Sam river refinery will be the center of navigation on the Missouri. Come to Atchison and see for yourself July 4, and also see the great river plant which the oil trust knockers said Uncle Sam would never build. However, would advise you to secure your stock at once.

Are Practical.

Are Practical.

There is a great demand for oil in Nebruska, lowa, the Dakotas and Minnesota, while in Omaha alone a great amount of oil can be sold. The oil trust railroads ask the prohibitive price of \$1.40 per barrel to carry barreled oil in carload lots from Cherryvale to Omaha. When completed the Uncle Sam company can pumpoil over pipe line from Cherryvale to Atchison for not to exceed 8 cents per barrel, and can barge it up the Missouri river for not to exceed 16 cents per barrel, or easily save over \$1.60 per barrel, however, to be absolutely sure, we fig-

Refined Oll Line to Fort Smith.

First Independent Company to Secure Territory.

The Uncle Sam Company is making a straightforward fight for success. When it says it will do a thing it starts to work. About 90 days ago a pipe line permit was petitioned for from the interior depart-

Will Buy Thousands of Barrels of Independent Oil.

While the Uncle Sam Company will have a great production from its own or controlled wells, it will buy thousands of barrels from independent producers from all over the Kansas and territory oil fields. For over 160 miles the main trunk pipe line will extend through the oil fields. At this very hour an Uncle Sam man is making arrangements to huy the oil from certain Woodson county, Kansas, producers near Le Roy, whom the oil trust has kept on the black list from the start. Uncle Sam Company is manned by Kansans who are working with might and main to build up their enterprise to-where it can protect our home

Earning Capacity Will Be increased Tenfold July 4.

With the opening of the Uncle Sam refinery No. 2 at Atchison, July 4, will increase the average earnings for the next six months over the last six months nearly tenfold. Then a few weeks later Uncle Sam refinery No. 3 will be opened at Tulsa, Indian Territory. This will build our refining capacity up to FIFTEEN HUNDRED barrels per day. By that time the production from our own

Dividend Book Will Be Closed on the 20th

Dividend Book Will Be Closed on the 20th of This Month.

The first dividend on Uncle Sam stock will be declared this month and will be mailed to every stockholder not later than July 20. With the earning capacity of the company increased tenfold, it will be an easy matter to greatly increase the next dividend. The time for you to secure your stock is right now for if you delay until after the 20th, you will not receive the first dividend, and the chances are the stock will be greatly increased big river reflacry on July 4.

Stock Totals \$23,488.

That this stock is in demand and certain to be all sold during the next few days can be proven by the books of the company, and especially the returns for the past week, which have been running from \$3,000 to \$5,000 daily. Where can you buy as active a stock as this, backed with anything like the development at 20 per cent of its par value?

under absolute control. That it is a big oller among big ollers you would readily admit by spending a few minutes at the well. It is the largest oller ever completed in that part of the Osage nation, with the indication good that at least 100 feet of the 120 feet of sand will be found in a nearby location to contain oil, in which event you will see this stock greatly advanced or withdrawn from the market.

Fifty More Distributing Stations.

At least fifty more distributing stations will be installed in that many more trade centres in the Missouri Valley States during the next sixty days. These stations will be located where Uncle Sam synpathizers are thicker than Democrats in Arkansas. The company has had no trouble to dispose of all the oil it has manufactured from the Cherryvale plant No. 1 at the distributing stations now completed, while there are 500 more places just as good as what the company has airendy covered, so we will have no trouble to sell all the increased output at good prices, with a fair profit.

Investors in the United States. fifteen thousand men by special weekly reports. The company has secured very

Write or Wire for Particulars and Pic-

past week, which have been running from \$3,000 to \$5,000 daily. Where can you buy as active a stock as this backed with anything like the development at 20 percent of its par value?

Two More Fortune-Makers Nearly Completed.

When you stop to consider that a barrel of 32 gravity oil run through our refineries will bring Uncle Sam over \$4 per barrel, you will agree that calling big offers like Nos. 13 and 14 just drilled in cleven hundred-acre lot 43 arc fortune-makers in fact as well as name. Nearly \$50 feet of rich pay dirt was secured in the campany nearly \$100 to 200 barrels per day. One day later the drill at No. 14 struck the oil, and when completed showed 60 feet of now over 1,600 feet. This shows a gain over the last well in this sand of nearly 400 to 700 barrels per day. One day later the drill at No. 14 struck the oil, and when completed showed 60 feet of now over 1,600 feet. This shows a gain over the last well in this sand of nearly 400 to 71 his clearly indicates that the pay oil sand is increasing westward, and Uncle Sam can go for two miles straight.

Monthly Payment Offer.

From the start Uncle Sam Company has made it possible for men of limited means to join the company, and in addition to effecting treasury stock at the above mentioned cash price, will sell on menthly payments as follows:

Shares Six Monthly Payments.

50 3 2.00 cash Six Monthly Payments.

50 3 2.00 cash \$1.50 cach 100 cach 250 7.50 cash \$2.00 cach 100 cach 100 cach 15.00 cach 15.00 cach 15.00 cach 15.00 cach 90.00 cash 90.00 cach 5.000 follows 15.00 cach 15.00 cach 15.00 cach 15.00 cach 15.00 cach 15.000 cach 15.000

In Conclusion.
